6/22/2005

APPROVAL LETTER

Principal Investigator: Ananda Goldrath
Protocol # S04105
Title: Naïve and Memory CD8+T Cell Homeostasis and Survival
Species: Mouse – 1750 Pain C, 170 Pain D
Approved: 6/15/2005
Expires: 6/30/2006

The Institutional Animal Care and Use Committee has renewed this project and you may continue with your animal studies. Any change to the originally approved protocol, including addition of personnel, requires that an amendment be submitted for IACUC review and approval before that change can be implemented.

It is your responsibility as Principal Investigator to ensure that all members of your laboratory staff have a copy of the protocol and understand their individual responsibilities. Your electronic signature on your protocol application indicates that you understand and will comply with 14 Investigator Assurances; these are included for you on the attached document. Please review all of these assurances.

Thank you for your cooperation in complying with federal regulations regarding the care and use of laboratory animals: Public Law 99-158, the Health Research Extension Act, and Public Law 99-198, the Animal Welfare Act which is regulated by USDA, APHIS, CFR, Title 9, Parts 1, 2, and 3.

Tony L. Yaksh, Ph.D.
Chair
IACUC

Morton Printz, Ph.D.
Vice Chair
